Profile

Backend Developer specialized in .NET Core and REST APIs, with experience in scalable systems, SQL Server optimization, and data-driven solutions. Focused on performance and delivering efficient solutions.

Experience

Backend Web Developer (Internship), GMAOLinx Centroamérica – Cartago, Costa Rica 2024

- Implemented and maintained features using JavaScript and .NET Core.
- Optimized SQL Server query performance in multi-company environments.
- Managed and resolved incidents in web systems (server-side and client-side).

Full-Stack Web Developer (Supervised Practice), Municipalidad de Cartago – Cartago, Costa Rica 2024

- Designed and developed a parameterized system in ASP.NET, automating manual processes and improving operational efficiency.
- Replaced Excel reports with dashboards, reducing analysis from hours to minutes.
- Optimized SQL Server databases, reducing report generation time from several hours to seconds.

Skills

Programming Languages: C#, JavaScript
